UA Construction Engineering Management Students
Justin Davidson and Miguel Martinez Awarded the 2021-22 Heavy Civil Scholarship from the Beavers

Congratulations to Justin Davidson and Miguel Martinez on receiving the Beavers Scholarship for UA civil engineering students pursuing careers in heavy civil construction. The Beavers was founded in 1955 as a heavy civil construction association. “The purpose of the Beavers is to promote goodwill, friendliness and consideration within the heavy engineering construction industry; to give recognition to those men and women who have demonstrated particular skill, responsibility and integrity; and to encourage and support entry of promising young individuals into heavy engineering construction.” Justin and Miguel both interned with Granite Construction and were leaders of the UA Heavy Civil team that competed in ASC Region 6 & 7 in Reno, NV.
